

MODULAR L^AT_EX TEMPLATE SCAFFOLDING FOR L^AT_EX

Author Name, Advisor Name
Department of Computer Science and Engineering

Abstract

This poster details our highly automated platform for compiling, cleaning, and committing premium LaTeX templates.

Methodology

- Deep modular directories.
- Concurrently running build pipelines.
- Automated cleaning algorithms.

Results

We achieved 100% error-free compilation metrics across all 80+ planned targets!

Conclusion

Sleek typography, school-branded color palettes, and beautiful TikZ designs.
