PROFESSIONAL EXPERIENCE

Pediatric Speech-Language Pathologist

Vertex Therapy Services

June 2024 – Present

Bellevue, WA

- Manage a clinical caseload of 35+ pediatric clients (ages 2–16) presenting with expressive/receptive language delays, ASD, articulation disorders, and AAC needs.
- Design and implement neurodiversity-affirming treatment plans, resulting in a 45% average improvement in client functional communication outcomes.
- Administer and interpret standardized assessments (CELF-5, PLS-5, GFTA-3, CASL-2) to establish baselines and justify clinical necessity for insurance.
- Collaborate with multidisciplinary teams, including Occupational Therapists, Physical Therapists, and BCBA's, to optimize therapeutic efficacy.
- Conduct parent education sessions and design functional home programs to support communication carryover in daily routines.

Speech-Language Pathologist Clinical Fellow (CF-SLP)

Meridian Rehabilitation Center

Aug. 2023 – May 2024

Seattle, WA

- Completed ASHA Clinical Fellowship Year under licensed supervision, managing 28+ adult patients with cognitive-linguistic, voice, and swallowing disorders.
- Conducted bedside swallow evaluations and implemented dysphagia treatment plans, utilizing neuromuscular electrical stimulation and compensatory strategies.
- Administered cognitive-communication therapy for patients recovering from stroke and traumatic brain injury (TBI), targeting executive function and memory.
- Evaluated, programmed, and implemented high-tech SGD/AAC devices (e.g., TouchChat, Proloquo2Go) for non-verbal or minimally verbal adult patients.

CLINICAL PRACTICUM

Graduate Clinician – Pediatric Practicum

Synapse Developmental Clinic

Jan. 2023 – April 2023

Seattle, WA

- Evaluated and treated 12 pediatric clients with articulation, phonological, and language delays.
- Prepared weekly lesson plans, SOAP notes, and comprehensive diagnostic reports.

Graduate Clinician – Inpatient Rehabilitation

Apex Medical Center

Sept. 2022 – Dec. 2022

Seattle, WA

- Provided direct therapy to adults with aphasia, dysarthria, and dysphagia in an acute rehabilitation setting.
- Co-led weekly aphasia support and conversation groups for stroke survivors.

CLINICAL HOURS

400+ Clinical Hours

Completed ASHA Clinical Practicum requirements
in both pediatric and adult settings.
