

# Venture Debt Term Sheet Summary

Northstar Labs, Inc. | Pioneer Venture Bank

RECOMMENDATION

**Proceed to documentation, subject to four conditions.**

Preserve a minimum nine-month liquidity runway under the downside case; cap the MAC draw condition; add a 20-day equity-cure window; and narrow the IP security language to exclude ownership transfer.

## What matters most

| TOPIC                    | ASSESSMENT                                                                                        | READ-THROUGH               |
|--------------------------|---------------------------------------------------------------------------------------------------|----------------------------|
| ● <b>Runway</b>          | Extends base-case cash runway from Q1 2027 to Q4 2027 without an immediate equity round.          | Strategically positive     |
| ● <b>Debt service</b>    | Principal amortization begins in month 13, increasing annual cash debt service to roughly \$2.9m. | Refinance risk rises early |
| ● <b>Covenants</b>       | \$1.5m minimum cash plus 1.25× trailing-three-month revenue coverage, tested monthly.             | Limited downside cushion   |
| ● <b>Draw certainty</b>  | Material-adverse-change condition applies through funding, with broad lender discretion.          | Must narrow before signing |
| ● <b>Equity dilution</b> | 0.50% warrant, subject to customary anti-dilution and a ten-year exercise period.                 | Price cap / cashless only  |

## Conditions to approval

|   |                                                                                                                                 |                 |
|---|---------------------------------------------------------------------------------------------------------------------------------|-----------------|
| 1 | <b>Liquidity protection:</b> minimum cash covenant steps down to \$1.0m after the company raises at least \$8.0m of new equity. | CFO / Lender    |
| 2 | <b>Draw certainty:</b> MAC condition limited to objectively measurable events with a material effect on repayment ability.      | General Counsel |
| 3 | <b>Cure rights:</b> 20 days for reporting and revenue covenant breaches; equity cure permitted twice.                           | General Counsel |
| 4 | <b>IP collateral:</b> negative pledge plus springing lien only after an event of default; no ownership transfer.                | CEO / Counsel   |

Scope: Summary of the indicative term sheet only. Definitive loan, security, warrant, and intercreditor documents may change the economics and risk allocation.

## Core commercial terms

| TERM                        | PROPOSED                      | INTERPRETATION                                                                             |
|-----------------------------|-------------------------------|--------------------------------------------------------------------------------------------|
| <b>Borrower</b>             | Northstar Labs, Inc.          | Parent guaranty; domestic subsidiaries join subject to agreed materiality threshold.       |
| <b>Lender</b>               | Pioneer Venture Bank          | Sole lender and administrative agent; assignment rights subject to competitor restriction. |
| <b>Commitment</b>           | \$5,000,000                   | One funded term-loan tranche; no revolving availability.                                   |
| <b>Availability</b>         | Through 30 September 2026     | One draw after satisfaction of closing conditions; unused commitment expires.              |
| <b>Use of proceeds</b>      | Growth and working capital    | No acquisitions, dividends, or related-party payments without consent.                     |
| <b>Interest rate</b>        | 10.00% fixed                  | Actual/360; monthly in arrears; default rate is regular rate plus 5.00%.                   |
| <b>Interest-only period</b> | 12 months                     | No principal payments through month 12; no automatic extension.                            |
| <b>Amortization</b>         | 24 equal monthly installments | \$208,333 monthly principal beginning in month 13.                                         |
| <b>Maturity</b>             | 36 months after funding       | All principal, accrued interest, end fee, and other obligations become due.                |
| <b>Upfront economics</b>    | 1.50% fee + 1.00% OID         | \$125,000 deducted at closing; estimated net funding of \$4.875m.                          |
| <b>End-of-term fee</b>      | 2.00% of funded principal     | \$100,000 payable at maturity or upon earlier prepayment.                                  |
| <b>Prepayment premium</b>   | 3% / 2% / 1%                  | Steps down on the first, second, and third anniversaries; waived for lender refinancing.   |
| <b>Legal expenses</b>       | Borrower-paid; \$50,000 cap   | Cap excludes enforcement costs and third-party collateral work.                            |

## Illustrative repayment profile

| PERIOD       | PRINCIPAL          | INTEREST           | FEES             | TOTAL CASH OUT     |
|--------------|--------------------|--------------------|------------------|--------------------|
| At funding   | —                  | —                  | \$125,000        | \$125,000          |
| Months 1–12  | —                  | \$500,000          | —                | \$500,000          |
| Months 13–24 | \$2,500,000        | \$385,417          | —                | \$2,885,417        |
| Months 25–36 | \$2,500,000        | \$135,417          | \$100,000        | \$2,735,417        |
| <b>Total</b> | <b>\$5,000,000</b> | <b>\$1,020,834</b> | <b>\$225,000</b> | <b>\$6,245,834</b> |

Assumes funding of the full commitment, no default interest, no prepayment, equal monthly principal after the interest-only period, and no taxes or legal expenses. Rounding may cause minor differences.

## CASH-COST BRIDGE

|                                              |                    |
|----------------------------------------------|--------------------|
| Interest over 36 months                      | \$1,020,834        |
| Upfront fee + original issue discount        | \$125,000          |
| End-of-term fee                              | \$100,000          |
| <b>Total contractual cash financing cost</b> | <b>\$1,245,834</b> |

## EXCLUDES

Warrant value, legal fees, unused commitment effects, taxes, default charges, and any prepayment premium.

## Scenario sensitivity

| CASE            | EQUITY RAISE    | LOWEST CASH | COVENANT HEADROOM | CONCLUSION                  |
|-----------------|-----------------|-------------|-------------------|-----------------------------|
| Base            | Q2 2027 / \$12m | \$3.1m      | \$1.6m            | Compliant throughout        |
| Downside        | Q4 2027 / \$8m  | \$1.2m      | (\$0.3m)          | Breach in Aug 2027          |
| Severe downside | No raise        | (\$2.4m)    | (\$3.9m)          | Liquidity event in Jun 2027 |

**Key implication.** The debt extends runway, but it does not eliminate financing dependence. Management should begin the next equity process by January 2027, before principal amortization starts.

## Financial and reporting covenants

| REQUIREMENT               | PROPOSED THRESHOLD                                                     | NEGOTIATION VIEW                                                                                                                         |
|---------------------------|------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| Minimum unrestricted cash | \$1.5m at all times; tested monthly                                    | Seek step-down to \$1.0m after qualified equity raise. Exclude trapped or lender-controlled cash from the numerator only if unavailable. |
| Revenue coverage          | T3M recurring revenue $\geq 1.25 \times$ next-three-month debt service | Request 20-day cure period and two equity cures during the term. Define recurring revenue consistently with board reporting.             |
| Annual plan               | Board-approved budget within 30 days of fiscal year-end                | Accept, provided failure to approve does not itself create an immediate event of default.                                                |
| Monthly reporting         | Financials, compliance certificate, ARR bridge within 30 days          | Operationally feasible; align non-GAAP definitions and materiality thresholds before closing.                                            |
| Annual reporting          | Audited statements within 120 days                                     | Accept; allow 150 days for the first audit after closing.                                                                                |
| Banking relationship      | Primary operating accounts held with lender                            | Permit payroll, foreign, and payment-processor accounts subject to control-agreement thresholds.                                         |

## Collateral and lender controls

### Collateral package

- First-priority lien on substantially all domestic assets.
- Excludes equity in foreign subsidiaries above agreed tax limits, intent-to-use trademarks, and immaterial deposit accounts.
- IP subject to a negative pledge at closing; springing lien only after an uncured event of default.
- Deposit-account control agreements delivered within 30 days after closing.

### Negative covenants

- Additional debt basket: \$500,000 plus ordinary-course equipment financing.
- Acquisition basket: \$1.0m annually while pro forma compliant.
- No dividends or equity repurchases, except tax distributions and employee repurchases up to \$250,000 annually.
- Asset-sale basket: \$500,000 annually, with proceeds reinvested or used to prepay.

## Events of default and remedies

| TRIGGER                 | CURE                                                           | COMMENT                                                                              |
|-------------------------|----------------------------------------------------------------|--------------------------------------------------------------------------------------|
| Payment default         | 3 business days for administrative error                       | Standard; no cure for payment due at maturity.                                       |
| Covenant breach         | 10 days, if curable                                            | Seek 20 days for reporting and financial covenant breaches.                          |
| Cross-default           | Other debt above \$500,000                                     | Increase to \$1.0m and trigger only after acceleration, not mere default.            |
| Judgment                | Final judgment above \$500,000, unstayed 30 days               | Increase threshold to \$1.0m; net of insurance coverage.                             |
| Insolvency              | Immediate for voluntary action; 60 days for involuntary filing | Generally market; preserve board fiduciary flexibility.                              |
| Material adverse change | Immediate, lender determination                                | Delete as a standalone default; retain only as a narrowly defined funding condition. |

## Warrant economics

| COVERAGE                   | EXERCISE PRICE                                                                                   | TERM / METHOD                         | PROTECTION                                      |
|----------------------------|--------------------------------------------------------------------------------------------------|---------------------------------------|-------------------------------------------------|
| <b>0.50% fully diluted</b> | Lower of next-round price or current preferred price                                             | 10 years; cashless exercise permitted | Broad-based weighted-average anti-dilution only |
| OPEN DRAFTING POINT        | REQUIRED POSITION                                                                                |                                       |                                                 |
| Cap table definition       | Coverage fixed at issuance; no evergreen or automatic reset for option-pool increases.           |                                       |                                                 |
| Change of control          | Cashless exercise or fair-value cash settlement; no double-dip with prepayment premium.          |                                       |                                                 |
| Information rights         | Same confidentiality obligations as lender; terminate after warrant transfer to a non-affiliate. |                                       |                                                 |
| Transferability            | Affiliates and institutional transferees only; no competitor transfers without consent.          |                                       |                                                 |

**Concentration risk.** The combination of a cash minimum, revenue coverage test, operating-account control, and a broad MAC clause gives the lender multiple paths to restrict liquidity. These provisions should be negotiated as one control package, not in isolation.

Priority risk register

| LVL | RISK               | POTENTIAL IMPACT                                                                              | MITIGATION / OWNER                                  |
|-----|--------------------|-----------------------------------------------------------------------------------------------|-----------------------------------------------------|
| H   | Draw certainty     | Funding can be withheld after signing if the lender determines a broad MAC occurred.          | Narrow definition; objective tests / GC             |
| H   | Downside liquidity | Base-case compliant, but downside case breaches minimum cash before the modeled equity round. | Raise earlier; covenant step-down / CFO             |
| M   | Refinancing wall   | Amortization starts while the business remains cash-flow negative.                            | 18-month IO fallback; pre-negotiate extension / CFO |
| M   | IP remedies        | Broad lien language could complicate future financing or strategic transactions.              | Negative pledge + springing lien / GC               |
| M   | Effective cost     | Warrant value and legal expenses are outside the \$1.246m cash-cost estimate.                 | Independent warrant valuation / Finance             |
| L   | Rate exposure      | Fixed rate avoids benchmark volatility throughout the stated term.                            | No action required                                  |

Negotiation scorecard

| ISSUE                | TARGET                         | WALK-AWAY                   | STATUS       |
|----------------------|--------------------------------|-----------------------------|--------------|
| Interest-only period | 18 months                      | 12 months                   | ● Open       |
| Minimum cash         | \$1.0m after equity raise      | \$1.5m with cure            | ● Open       |
| MAC                  | Remove; objective funding reps | Narrow funding-only test    | ● Escalate   |
| Warrant coverage     | 0.35%                          | 0.50%; no resets            | ● Open       |
| IP collateral        | Negative pledge                | Springing post-default lien | ● Open       |
| Prepayment premium   | 2% / 1% / 0%                   | 3% / 2% / 1%                | ● Acceptable |
| Expense cap          | \$35,000                       | \$50,000                    | ● Acceptable |

Closing plan

| DATE   | MILESTONE            | DELIVERABLE / DEPENDENCY                                                  | OWNER           |
|--------|----------------------|---------------------------------------------------------------------------|-----------------|
| 04 Aug | Internal alignment   | Confirm negotiation mandate, downside model, and board observer position. | CFO / CEO       |
| 07 Aug | Term sheet mark-up   | Deliver consolidated commercial and legal comments to lender.             | General Counsel |
| 11 Aug | Credit re-approval   | Lender confirms revised covenant package, MAC, IP terms, and warrant cap. | Lender          |
| 14 Aug | Board consent        | Approve debt, security, warrant, and related-party disclosures.           | Corp. Secretary |
| 21 Aug | Definitive documents | Complete loan, security, warrant, and account-control documentation.      | Counsel         |
| 28 Aug | Funding              | Satisfy closing conditions; receive at least \$4.875m before expenses.    | CFO             |

Pre-signing checklist

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
